List of abbreviations

Chapter 1: Introduction

Why should you use this book?

What are ‘the top 100 drugs’?
How to use this book

Where next?

Chapter 2: The top 100 drugs listed by system

Cardiovascular system

Respiratory system

Nervous system

Gastrointestinal system and nutrition

Renal and genitourinary tracts
Endocrine and reproductive systems

Musculoskeletal system

Ophthalmology

Skin

Blood

Infection

Poisoning

Chapter 3: The top 100 drugs listed by indication
Acne

Acute coronary syndrome

Addison's disease

Adrenal insufficiency

Agitation, psychomotor

Alcohol withdrawal

Allergy

Anaemia

Anaphylaxis

Angina
Anxiety

Ascites

Asthma

Atrial fibrillation and flutter

Autoimmune disease

Benign prostatic hyperplasia

Bipolar disorder

Bone metastases

Bowel preparation

Bradycardia
Breathlessness
Carbon monoxide poisoning
Cardiac arrest
Chemotherapy
Childhood immunisations
Chronic kidney disease
Chronic obstructive pulmonary disease
Circulatory compromise
Clostridium difficile colitis
Constipation
Contrast nephropathy
Contraception, hormonal
Deep vein thrombosis
Dental infection
Depression
Diabetes mellitus
Diabetic ketoacidosis
Diabetic nephropathy
Diarrhoea
Dry eyes
Dry skin
Dyspepsia
Eczema
Endocarditis
Epilepsy, absence seizures
Epilepsy, focal
Epilepsy, generalised
Epilepsy, status epilepticus
Erectile dysfunction
Faecal impaction
Fever
Fluid and electrolyte therapy
Gastro-oesophageal reflux disease
Generalised anxiety disorder
Glaucoma, open-angle
Gout
Hay fever (seasonal allergic rhinitis)
Heart failure
Heart valve replacement
Helicobacter pylori eradication
Hepatic encephalopathy
Hormonal contraception
Hormone replacement therapy
Hyperaldosteronism
Hypercalcaemia of malignancy
Hyperglycaemic hyperosmolar syndrome
Hyperkalaemia
Hyperlipidaemia
Hypertension
Hyperuricaemia
Hypocalcaemia
Hypoglycaemia
Hypokalaemia
Hypopituitarism
Hypothyroidism
Hypoxaemia
Incontinence, urinary
Infection, complicated
Infection, fungal
Infection, protozoal
Inflammation
Insomnia
Irritable bowel syndrome
Ischaemic heart disease
Keratoconjunctivitis sicca
Korsakoff's psychosis
Leg cramps
Local anaesthesia

Lyme disease

Malaria

Meningitis

Migraine

Mucosal bleeding

Myocardial perfusion scan

Nausea and vomiting

Neural tube defects, prevention of
Obsessive compulsive disorder
Ocular hypertension
Oedema
Opioid toxicity
Osteomyelitis
Osteoporosis
Overdose
Paget's disease
Pain
Pain, neuropathic
Panic disorders
Paracentesis
Parkinsonism, secondary
Parkinson's disease
Peptic ulcer disease
Peripheral arterial disease
Pneumonia
Pneumonia, pneumocystis
Pneumothorax
Poisoning
Pruritus
Psoriasis
Psychomotor agitation
Pulmonary embolus
Pulmonary hypertension
Pulmonary oedema
Pyelonephritis
Reconstitution and dilution of drugs
Respiratory secretions
Rheumatoid arthritis
Schizophrenia
Sedation
Sepsis
Sepsis, intra-abdominal
Septic arthritis
Shock
Skin and soft tissue infection
Sjögren's syndrome
Smoking cessation
Stroke
Subacute combined degeneration of the cord
Supraventricular tachycardia
Tetanus
Thiamine deficiency
Tonsillitis
Trigeminal neuralgia
Tumour lysis syndrome
Ulcerative colitis
Urinary catheterisation

Urinary tract infection

Urticaria

Vaccination

Venous thromboembolism, prophylaxis

Venous thromboembolism, treatment

Ventricular fibrillation

Ventricular tachycardia

Vitamin D deficiency
Chapter 4: The top 100 drugs

Chapter 5: Fluids

Chapter 6: Self-assessment and knowledge integration
Chapter 7: Answers and explanations
Dedication and acknowledgement
This book is dedicated to our families, without whose support and patience we would not have been able to write it.
Many students at St George's, University of London contributed to the development of this book. We wish to express our gratitude to them all, but most particularly to those who participated in the projects that generated the ‘Top 100 Drugs’ list, and to
the members of a focus group convened to ensure the book would meet their needs.
any information storage and retrieval system, without permission in writing from the publisher. Details on how to seek permission, further information about the Publisher's permissions policies and our arrangements with organizations such as the Copyright Clearance Center and the Copyright Licensing Agency, can be found at our

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or
medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods,
compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional
With respect to any drug or pharmaceutical products identified, readers are advised to check the most current information provided (i) on procedures featured or (ii) by the manufacturer of
each product to be administered, to verify the recommended dose or formula, the method and duration of administration, and contraindications. It is the responsibility of practitioners, relying on their own experience and
knowledge of their patients, to make diagnoses, to determine dosages and the best treatment for each individual patient, and to take all appropriate safety precautions.

To the fullest extent of the law, neither
the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any
methods, products, instructions, or ideas contained in the material herein.
